CORE (UX TECHNICAL / STRONG IN FIGMA)

- AI UX/UI Design
- Animation Design
- Agentic AI (designing usability testing)
- Strategic Thinking
- (HTML/CSS/JavaScript
- Information Architecture (IA) Roadmap
- Figma/Wireframes/ Prototypes
- Stakeholder Management
- Monday/ Teams/Mural

AI & CREATIVE TOOLS

- ChatGPT / Google Gemini
- Midjourney/Runway
- Figma / Figma AI
- React/Three.js/
- Adobe photoshop/ Illustrator/ Firefly
- Adobe premiere pro/After Effects

PERSONAL:

I design AI-driven products, intelligent interfaces, and scalable digital experiences that transform complex enterprise systems into intuitive user journeys. With 15+ years across UX, Product Design, and Innovation, I specialise in AI workflows, conversational UI, agentic systems, multimodal UX, and AI-enabled transformation across enterprise environments.
My approach combines customer- UX centric thinking with experience-led AI delivery. I design intuitive workflows, interaction models, and intelligent user experiences that translate complex systems into seamless, human-centred solutions — aligning user needs, business goals, for enterprise AI adoption, improving usability, stakeholder engagement, operational efficiency, and scalable product delivery.

I bring a strong hybrid capability across AI product strategy, UX innovation, and frontend prototyping. I am highly proficient in Premium Figma workflows, modern AI design ecosystems, and 3D + AI experiences, I rapidly prototype concepts from idea to deployed experience. I collaborate closely with developers, stakeholders, and cross-functional teams to co-create high-impact AI products that deliver measurable business value through scalable, intelligent design.

EMPLOYMENT:

IBM — AI UX Innovation Designer | 2021–2026

Led the design of Agentic AI solutions aligned with AML, KYC, and enterprise compliance frameworks.

- Delivered scalable AI workflows that improved operational efficiency and reduced business risk.
- Collaborated with global cross-functional teams to accelerate enterprise AI adoption and innovation.
- Led global workshops aligning business, engineering, and partner teams on strategy, delivery, and AI transformation initiatives.
- Influenced senior stakeholders by balancing user needs, technical feasibility, regulatory requirements, and business priorities.
- Established repeatable, scalable delivery frameworks aligned with ecosystem growth and enterprise transformation.
- Applied advanced strategic UX and problem-solving principles to the design
- Translated complex technical and business requirements into intuitive interaction models, workflows, and user journeys.
- Delivered accessible, mobile-first AI solutions at enterprise scale.
- Designed intelligent interfaces and conversational AI experiences focused on usability, trust, and adoption.
- Created scalable multimodal UX experiences across AI-driven enterprise platforms.

Vodafone / Accenture — Senior UX Product Designer | 2021

• Owned end-to-end product lifecycle from research to delivery
• Designed cross-platform UX experiences for enterprise products

Ocado · Technip · Capgemini · HSBC · ASOS | 2013–2021

• Delivered enterprise UX strategy across fintech, e-commerce, and SaaS
• Led user research, service design, and journey mapping, digital transformation.
